

# Kolbe Zimmerman

---

## CERTIFIED WEB + WEB APP DEVELOPER

---

Passionate, Hardworking, and a big team player with great communication skills wanting to further my knowledge and experience in the creative processes of code.

### TECHNICAL SKILLS

---

**Languages + Compilers:**

JS + TypeScript, CSS + SASS, HTML + templating, NodeJS, MongoDB, Firebase

**Frameworks + Libraries:**

ReactJS, Angular, Jasmine, Angular Material, Bootstrap

**Other:**

Git + GitHub, Jira

### EDUCATION

---

**Mountainland Technical College**

2020-2021 (Lehi, UT)

I completed and received certification for a web developing course at Mountainland Technical college to learn and adapt skills to become a successful developer. We had different instructors who are currently working in the industry teach us how to code websites/apps using different frameworks and libraries.

### EXPERIENCE

---

**Frontend Developer Intern @ Landvoice**

2021-2022

I completed an internship at Landvoice working with Angular to help redesign their sign-up page (mobile, desktop, and tablet version) and get exposure to working within a company.

## PROJECTS

---

### Golf Score application

<https://github.com/KolbeJZ/angular-golfapp/tree/master>

I created a Golf Scorecard app in JavaScript. This app allows you to choose a specific course out of three choices, you can also choose how many players are playing out of 4, and what type of tee you're playing on. This app also allows you to keep track of your points.

- I learned more about functions and how to work with them.
- I used loops to keep the code simplistic.
- I also learned more about working with an API.

### News API application

<https://github.com/KolbeJZ/news-angular-group/tree/master>

This was a news app that I worked on with another classmate. It uses an API to bring in the top news of today, and different categories of news. You can use a search function to look up news articles by title, and you can also login and like an article and it will save to your profile.

- This project helped me learn how to develop with another developer, and helped me learn to manage tickets.
- I learned how to manage the API and keep the app looking professional.

## AWARDS

---

Hugh O'Brian Youth Leadership

Sports Marketing Certificate
